KEEP PUBLIC SERVICES PUBLIC

Tell the Kenora District Services Board **NOT** to download non-emergency ambulance services. This will lead to contracting out.

When public services are contracted out to private companies, the public suffers. Private companies demand a profit. To get that profit, they frequently charge user fees and often reduce services.

Your tax dollar should stay in this community AND provide public services. Your taxes should NOT go to the profits of private companies.

Frequently there are no emergencies when transferring a senior from a nursing home to hospital, a patient to be airlifted, or doing the long-distance transfers. However, there are times when experienced and knowledgeable paramedics were suddenly required to use their skills – skills that will not exist if non-emergency transfers are contracted out.

Do you want to risk the lives of your loved ones or your own?

Tell your Kenora District Services Board representative that you want your non-emergency ambulance services to remain public.
